Subject: Tar Results from TITL Compared to PM Advertised Tar

Please find attached Table 1 which is similar to Table 1 from an earlier memo with the exception that it contains the Rounded Values for TITL Market Sample #33. From this table, four additional tables have been created.

Brands which have different results when comparing TITL Market Survey #33 and PM Advertised Tar are listed in Tables 2 and 3. In addition, I have listed brands where agreement exists between TITL Market Survey #33 but differ from the PM Specification for Manufacturing. These brands are listed in Tables 4 and 5.
